

#### **Reiner Hengstmann**

#### Social & Environmental Affairs PUMA AG

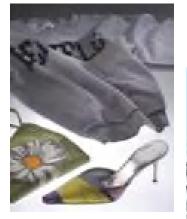

#### **GENERAL PROCEDURE**

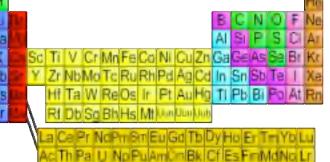

- Get certificates or follow the testing procedure
- All materials have to be verified
  - Use accredited labs
- Company RSL must be fulfilled
- Ship only products in compliance with company RSLs!

# **TESTING GUIDANCE**

All materials which are used in production must be compliant

- Dark colors present a higher risk of failure
- Whites randomly for certain parameters
  - New and not yet known materials/compositions
  - Only production related material and no samples

# **TESTING**

What is the customer preference for buying textiles?

# Pnismed workers merely the tip of an iceberg

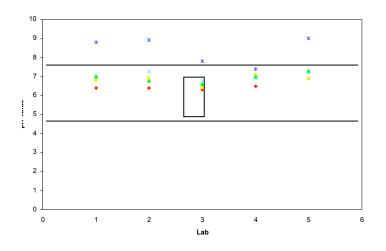

# TESTING

#### WHY IS IT IMPORTANT TO TEST?

- Consumer safety
  - Product safety
- Production safety
- Environment safety
- Workplace and worker safety

pH round robin test

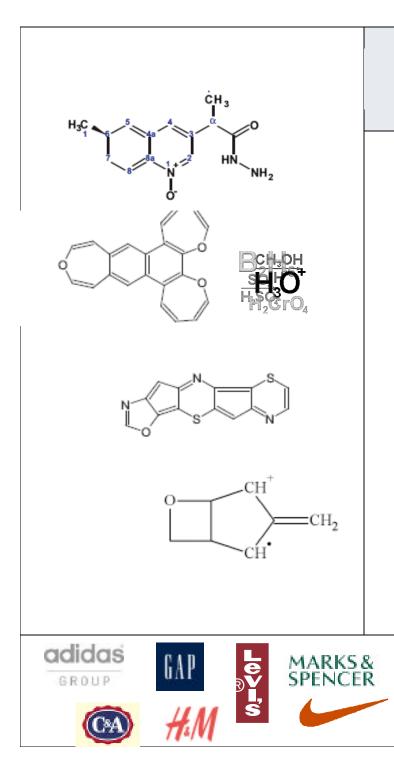

5 labs only one passed

# WHO SHOULD DO THE TESTING?

- Labs with an international reputation
- Labs which are accredited
  - Labs which participate frequently in round robin testing

#### WHEN AND WHAT TO TEST?

- Follow company RSL requirements
- Oeko-Tex 100 Standard, if required by customer

### **TESTING GUIDANCE**

- Have a standard procedure
- Test every season or every new material, as required by customer
  - Be proactive to avoid wasting money
    - Make testing as efficient as possible

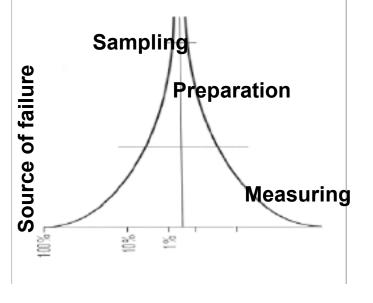

#### **TESTING GUIDANCE**

- Use company specified test methods. If none specified, use internationally recognized test methods.
- Make sure results will be globally comparable.
- In case of questions, do not act on your own. Contact your customer.

\_\_\_\_ Total = \_\_\_\_ Sampling + \_\_\_\_ Preparation + + \_\_\_\_ Measuring

# **TESTING GUIDANCE**

- The testing procedure starts with the sampling
- Poor sampling may cause failures, delays, and increase costs
- Every test result is only as good as the technique of taking the sample

#### Example:

Supplier collected a fresh water sample

- Failed because it contained 3,000 Coliform bacteria which may lead to serious health effects
- Could have led to needless investment to improve water supply
- Finally found out that the sampling technique was wrong, correct sampling and retesting resulted in acceptable results
